

Vistar LR Management

User Guide · Digital Lorry Receipts, Freight & Payments

A simple, paperless way to create, track and get paid for every consignment.

Why this app

From paper registers to one connected digital system

The old way

- Hand-written LR slips and registers
- Slips get lost, torn or mis-filed
- Freight and advances tracked on paper
- No live view of pending payments
- Reports take hours to compile by hand
- Hard to know each trip's real margin

With Vistar LR Management

- Create an LR in under a minute
- LR numbers generated automatically
- Every freight and charge captured cleanly
- Payments tracked right to completion
- Search, filter and export in seconds
- Margins and incentives always visible

What the app does

Everything you need for lorry receipts, in one place

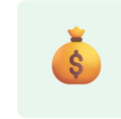

Create & Manage LRs

Capture parties, vehicle, route, goods and freight for every consignment.

Print Consignment Notes

Generate a clean, ready-to-print LR copy the moment it is saved.

Freight & Payments

Track freight, all charges, advance and balance with an auto Total.

Client Incentives

Record express and extra-point charges and split them driver vs Vistar.

Accounts & Billing

90% advance now, 10% balance after POD - fully tracked for accounts.

Reports & MIS

One-click Excel / MIS export with region, user and date filters.

How the app is organized

Everything lives in the menu on the left

Operations

- Dashboard
- Lorry Receipts
- Create LR
- E-Way Bills
- Warehouse

Masters

- Parties
- Vehicles
- Drivers
- Transporters
- Routes
- Part Descriptions

Insights

- Reports
- Accounts & Billing

System

- Admin Panel
- Regions

Who uses it

You only ever see the screens and figures your role allows

Operations

- Create and manage LRs
- Handle dispatch and e-way bills
- Send LRs for payment

Accounts

- See LRs sent for payment
- Pay 90% advance, settle balance
- Billing and MIS export

Admin

- Manage users and regions
- App settings and LR format
- Full visibility across data

Getting started

Signing in

1

Open the web link in any browser

Works on laptop, desktop or mobile - no install needed.

2

Enter your email and password

Use the credentials shared by your administrator.

3

You land on your Dashboard

From here the left menu takes you anywhere in the app.

Forgot your password? Use the ["Forgot password"](#) link on the login screen to reset it by email.

Your Dashboard

A quick health-check the moment you log in

- See your total LRs and the most recent activity at a glance
- Quick counts - LRs in progress, pending payments and more
- Margin and money figures appear only if your role permits
- Jump straight to Create LR or the Lorry Receipts list
- A fast way to spot what needs attention today

Create a Lorry Receipt

Six simple sections, filled top to bottom

1

Parties

Consignor (sender) and consignee (receiver)

2

Vehicle & Route

Vehicle auto-fills driver and transporter

3

Invoice & Goods

Invoices, items, packages and weight

4

Freight & Payment

Freight, charges, advance - Total auto

5

Incentive Charges

Express and extra-point client incentives

6

Save

LR number is generated automatically

Create an LR – details (steps 1 to 3)

1. Parties

- Choose the Consignor (sender)
- Choose the Consignee (receiver)
- Add a new party inline if it is missing
- Pick the Customer

2. Vehicle & Route

- Pick the vehicle
- Driver and transporter auto-fill
- Pick the route
- Freight pre-fills from the route base rate

3. Invoice & Goods

- Add one or more invoices
- List items and package details
- Enter weight and value
- E-Way Bill number if applicable

Freight & Payment

Every charge, with Total and Balance worked out for you

Charges you enter

- Freight (base transporter cost)
- Door Delivery, Handling, Insurance
- Additional Freight, Halting Charge
- Mathadi
- Advance and Pay Type

Calculated automatically

- Total = Freight + all charges
- Balance = Total minus Advance
- Vistar Margin (auto)

Tip: the exact fields you see depend on your permissions - transporter and margin figures are hidden from users who should not see them.

Client Incentives

Express Charges and Extra Point Delivery

Sometimes a client pays a little extra for great, on-time service. Record it here and split it between the driver and Vistar - the split is not fixed, you decide it per LR.

Worked example

Client pays (Express): ₹5,000

Driver's share: ₹3,000

Vistar margin: ₹2,000

Key points

- Enter the client amount and the driver's share
- Vistar margin is worked out automatically
- The driver's share is paid WITH the balance (after POD) - never with the advance
- Accounts and the payment email show the full split

Two heads are supported: Express Charges and Extra Point Delivery. Each is split the same way.

Find any LR in seconds

Search and filters, all on one row

Search

By LR number, party, vehicle or e-way bill.

Status

Filter by the LR lifecycle stage.

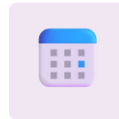

Route

Show only a chosen route.

Region

Narrow to a region.

Date Range

Pick a from - to window.

Combine any of these together - the record count at the top updates live as you filter, so you always know how many LRs match.

Print an LR

A clean consignment note, ready to hand over

1

Open the LR, or use the printer icon in the list

The printer icon sits next to each LR in the Lorry Receipts list.

2

The print view opens

A tidy, formatted copy of the consignment note.

3

Print, or save as PDF

Use your browser's print dialog to print or save a PDF.

Good to know: Print is available as soon as the LR is saved - no need to wait for any approval step.

Payments & Accounts

The 90 / 10 advance and balance flow

1

Operations clicks Send for Payment

The LR reaches the Accounts queue and an email is sent to the team.

2

Accounts pays the 90% advance now

Using Mark Advance Paid on the LR payment card.

3

After POD, Complete Payment settles the rest

The 10% balance is paid - together with any driver incentive.

Awaiting Advance → **Awaiting Balance** → **Paid**

Every LR moves through these three clear stages, so Accounts always knows what is due.

Reports & MIS Export

Numbers your finance team can trust

- Live totals and margins on the Reports screen
- One-click MIS export to Excel
- Filter by region, by user (creator) and by date range
- Money columns respect each user's permissions
- Perfect for month-end billing and reconciliation

Keeping data accurate

Good masters mean correct LR and margins

- Maintain Parties, Vehicles, Drivers and Transporters
- Keep Routes up to date with cities and rates
- Part Descriptions speed up goods entry
- Accurate masters make every new LR faster and error-free

Important tip - how Vistar Margin works

Vistar Margin = the route's Customer Rate – Freight. If a route has no Customer Rate set, its LRs show a zero margin. Set the Customer Rate on each route (Masters → Routes) so margins show correctly.

Thank you

We built this to make your daily work faster, clearer and paperless.

A few quick tips

- Save often - you can always add more on edit later
- Only fill what you know now; the rest can follow
- Use the filters to find any LR in seconds
- Can't see a screen? Ask your admin for access
